

U.S. Women in Nuclear (U.S. WIN) is an organization of women and men who work in nuclear energy and technology fields around the United States. Our vision is aimed at positioning the United States for the future of nuclear energy and technology through the advancement of women. U.S. WIN's objectives are to:

- Drive a culture in nuclear energy and technology in which women and men succeed
- Create professional development and networking opportunities for career advancement
- Enhance understanding and awareness of the value of nuclear energy and technology

Core Initiatives

Professional Development

U.S. WIN is focused on developing and implementing professional development opportunities for U.S. WIN members that align with U.S. WIN's overall strategic objectives. We are passionate about professional development and provide opportunities to U.S. WIN members through leadership activities, webinars, and mentorship.

Advocacy for Nuclear Energy and Technology

U.S. WIN strives to enhance understanding and awareness of the value of nuclear energy and technology and/or Science, Technology, Engineering and Mathematics (STEM) subjects through public outreach within our local, regional and national communities. Advocacy and Educational resources are available on the U.S. WIN website. U.S. WIN also partners with the Nuclear Energy Institute, Nuclear Matters and Mothers for Nuclear among others.

Networking

U.S. WIN develops and encourages activities where U.S. WIN members meet and mingle with each other and/or other industry professionals to develop professional contacts. Professional and student chapters are located across the United States. The National Annual Conference offers networking engagement for members and is held in a different region every year.

For more information on how you can join and participate in U.S. Women in Nuclear, please visit our website: www.winus.org. Membership is free.
