### North American Young Generation in Nuclear

- > [NAYGN Onboarding Toolkit](#)
- > [Literature](#) - children's books
- > [Student Outreach](#) resources

---

### U.S. Women in Nuclear

The U.S. Women in Nuclear Outreach Library is a high-quality, member curated resource where members discover tried-and-true ideas and activities for STEM outreach and interfacing with the public. U.S. WIN members can access the [Outreach Library](#). To become a member of U.S. WIN, visit [winus.org](#). Membership in U.S. WIN is free; and the benefits extend far beyond the outreach library!

---

### Nuclear Energy Institute

NEI has provided several resources for you to share with your communities for your Nuclear Science Week activities.

- > [NEI's Advanced Reactor Hub](#): Access our Advanced Nuclear 101 content, information on the road to deployment, how nuclear can power other industries, as well as a section that breaks down content based on the audience – communities, policymakers, investors, international parties, and industries. Visit [nei.org/advanced](#) for all this information and more.
- > [NEI has a new podcast!](#) Share Fissionary with your networks. Fissionary focuses on exploring a world powered by nuclear energy through conversations with experts, researchers, and influencers. The podcast aims to target those without a technical background to help bridge the gap and provide quality information on the value of nuclear. Episode 1 is live now and features Grace Stanke, Miss America. Visit [nei.org/fissionary](#) or search for Fissionary wherever you get your podcasts.
- > [Nuclear for the Next Generation](#): Add video elements to your Nuclear Science Week activities by including NEI's new campaign with your stakeholders and communities. Access the video at [nei.org/generation](#).
